

This list is a supporting document relating to the product review process which is administered by Student Finance England (SFE) on behalf of the Department for Education (DfE).

The product review process considers applications from products which have not previously been funded via the Disabled Student Allowance (DSA). The list of software products that have previously attracted DSA funding is below and should be checked before a submission is made. Please note that this list is only intended to cover products which incur a cost to a student's DSA award.

If you have any questions about the process, feel that there is something missing from the list below or would like to request an application form you should contact SFE via email at:

DSA_new_product_application@slc.co.uk.

Please note that in all instances SFE needs to be satisfied that any product that is recommended fulfils an essential need that the student is obliged to incur. Inclusion on the list below does not guarantee that, where it has been recommended to a student by a Needs Assessor, the product will be approved for funding.
