

NHS Guidance

Higher Education Student Finance in England 2022/23 Version 1.0 March 2022

Summary

This guidance describes the various elements of student support which are available for students who are undertaking health-related courses, including those courses that may attract NHS bursary funding.

Disclaimer

This guidance is designed to assist with the interpretation of the Student Support Regulations as they stand at the time of publication. It does not cover every aspect of student support, nor does it constitute legal advice or a definitive statement of the law. Whilst every endeavour has been made to ensure the information contained is correct at the time of publication, no liability is accepted with regard to the contents and the Regulations remain the legal basis of the student support arrangements for the academic year (AY) 22/23. In the event of anomalies between this guidance and the Regulations, the Regulations prevail. Please note the Regulations are subject to amendment.

Please note this guidance is for students domiciled in England only.

1. General

1.1 NHS / healthcare bursaries

From AY 17/18 the availability of NHS income assessed bursaries* changed. However, the following guidance remains relevant to students on certain courses which lead to a qualification in healthcare roles, including those courses where National Health Service (NHS) bursaries or Department of Health and Social Care (DHSC) bursaries are still available.

(*or similar awards bestowed under section 63 of the Health Services and Public Health Act 1968, article 44 of the Health and Personal Social Services (Northern Ireland) Order 1972 or sections 73(f) of the Education (Additional Support for Learning) (Scotland) Act 2004 (as amended in 2009))

Bursaries of this kind can be non-income assessed or income assessed, which impacts the Student Finance England (SFE) products that students can apply for.

- Students eligible to apply for a non-income assessed bursary are not eligible to apply for any SFE funding (regulation 4 (3)(c)).
- Students eligible to apply for an income assessed bursary will not be eligible to apply for support for tuition costs, (regulation 19 (2)) or any grants (regulation 38(4)(a)), however such students are eligible to apply to SFE for the non-income assessed reduced rate maintenance loan (RRML) (regulation 68(e)(i)). The reduced rates of maintenance loan for AY 22/23 are:

MAXIMUM RATES OF FULL YEAR LOAN (Table A4 Financial Memorandum AY 22/23)	
Loan rate	Maximum RRML (£) (bursary year)
Parental home	1,902
London	3,558
Elsewhere	2,534
Overseas	2,534
MAXIMUM RATES OF FINAL YEAR LOAN	
Parental home	1,443
London	2,724

Elsewhere	1,975
Overseas	1,975

All new entrants to NHS funded courses receive the income assessed NHS bursary and will also receive a non-income assessed grant of £1,000 from the NHSBSA. These students can still apply for the RRML.

From AY 17/18, NHS and healthcare bursaries were removed for the majority of students starting healthcare courses. Please see below for more information.

Additional information on student support currently available from the NHS directly can be accessed via the NHSBSA website <https://www.nhsbsa.nhs.uk/healthcare-students>.

2. Nursing, midwifery and Allied Health Profession students

2.1 Courses starting on or after 1 August 2018

2.1.1 Changes to support for dental hygiene/dental therapy (DH/DT) courses

Students starting a DH/DT course in England or Scotland on or after 1 August 2018 are no longer eligible to apply for an NHS bursary. (Note that continuing students on DH/DT courses at certain Health Trusts can still apply for the NHS bursary. Please see below for further information.) Where a bursary is not available, they will instead be entitled to the standard package of support under the Regulations, including fee support, maintenance support and supplementary grants. For more information on the products available please see the “Assessing financial entitlement” guidance.

This change applies to the following students:

- Students who start an eligible DH/DT course on or after 1 August 2018. This includes:
 - Students starting an eligible DH/DT course and entering year one in AY 18/19 or later.
 - Students starting an eligible DH/DT course and directly entering a year greater than one in AY 18/19 or later.
- Students starting an eligible DH/DT course on or after 1 August 2018, having withdrawn from or abandoned a previous HE course (UG or PG) in AY 17/18 or an earlier AY.
- Students starting an eligible DH/DT course on or after 1 August 2018, having transferred from a course that was NOT an eligible DH/DT course that started before 1 August 2018.
- Students starting an eligible DH/DT course on or after 1 August 2018, having transferred and in doing so changed modes (FT to PT, PT to FT) from a previous course started before 1 August 2018.

- Students starting an eligible DH/DT course on or after 1 August 2018 in order to top-up a previously completed lower-level qualification to Honours.
- Students starting an eligible DH/DT course on or after 1 August 2018, having completed a lower level qualification immediately before (disregarding the intervening vacation).
- Students entering year one of a DH/DT course with an integral foundation year on or after 1 August 2018.

The Learning Support Fund from the NHSBSA will be made available to students studying DH/DT courses who are no longer eligible to apply for an NHS Bursary. Please see section 2.2.1 for details of the additional support provided by the NHSBSA Learning Support Fund.

Students who start a DH/DT course in Wales on or after 1 August 2018 will continue to be subject to the requirement to commit to a post-graduation employment period that was introduced in AY 17/18, before they are eligible to apply for an NHS bursary. Where a student has not committed to the employment period, they will not be eligible to apply for an NHS bursary and will be eligible for the standard package of support from SFE.

There are no DH/DT courses currently designated for SFE students in Northern Ireland.

2.1.2 NHS Non-means tested grants

Students starting or continuing pre-registration courses in nursing, midwifery and the allied health professions in the 2022/23 academic year will qualify for non-means tested grants from the NHS in addition to the standard tuition fee loan and living costs support package from Student Finance England.

2.1.3 Dental Hygiene and Dental Therapy (DH/DT) courses run at Health Trusts

Continuing students who began in AY 18/19 and prior

Continuing students who started in AY 18/19 and prior on DH/DT course at the following Health Trusts retained their eligibility to apply for the NHS Bursary:

- Birmingham Community Healthcare NHS Trust
- Bristol Dental School
- Greater Manchester DCP School
- King's College Hospital Foundation Trust
- Eastman Dental Hospital

DH/DT courses provided by Birmingham and Bristol are validated, respectively, by Birmingham University and University of Bristol and are designated for student support.

Students attending at these trusts are eligible to apply for the NHS bursary and are therefore only entitled to RRML from SLC.

DH/DT courses provided by the other trusts are not designated for support under the Regulations due to the structure and nature of these courses. These providers cannot access the wider financial support available to other HEP's (even through validation agreements). The NHS bursary was retained for these courses to ensure their sustainability.

New students from AY 19/20 and onwards

The Department for Education has confirmed from AY 19/20 and onwards, new students studying DH/DT courses run by the Health Trusts (listed on page 6) are no longer eligible to apply for the NHS bursary.

DH/DT courses provided by Birmingham Community Healthcare NHS Trust, Bristol Dental School and Greater Manchester DCP School are validated by Birmingham University, University of Bristol and Manchester University respectively. Therefore, new students studying DH/DT courses from AY 19/20 are eligible for the standard package of support under the Regulations.

From AY 19/20, new students studying DH/DT courses provided by the other trusts are not eligible for the NHS bursaries or SFE funding as they are not validated by an approved HE Provider. It should be noted that these health trusts do not intend to recruit in AY 22/23.

2.1.4 Changes to NHS Bursary support for part-time students

As a result of the introduction of part-time maintenance loan (PTML) in AY 18/19, students who are entitled to the PTML will no longer be eligible for the NHSBSA maintenance bursary.

Students who start a PT course on or after 1 August 2018 and who are undertaking an eligible course will be assessed by SLC for PTML. See the 'Support for PT students' guidance chapter for more details.

2.2 Courses starting on or after 1 August 2017

2.2.1 Students studying in England

Students who started studying on nursing, midwifery and AHP courses on or after 1 August 2017 are not eligible to apply for the NHS bursary, and are instead entitled to the standard package of support under the Regulations, including fee support, maintenance support and supplementary grants. For more information on the products available please see the "Assessing financial entitlement" guidance.

Note that in England the AHP courses that no longer attract a bursary are chiropody, dietetics and nutrition, occupational therapy, operating department practice, orthoptics,

physiotherapy, podiatry, prosthetics and orthotics, radiography, radiotherapy and speech and language therapy.

DH/DT courses that started in AY 17/18 continue to attract the income assessed bursary and will be subject to the same support arrangements as previously. Please see section 2.1.1 for additional information on support available to students on DH/DT courses that start in AY 18/19 or later.

The bursary is not available for the following categories of student:

- Students starting a healthcare course for the first time on or after 1 August 2017
- Students starting a healthcare course on or after 1 August 2017, having withdrawn from or abandoned a previous Higher Education (HE) course in AY 16/17 or an earlier AY
- Students starting a FT healthcare course on or after 1 August 2017, having transferred from a previous PT course or FT distance learning course which started before 1 August 2017
- Students starting a top-up healthcare course on or after 1 August 2017, having completed a lower level qualification previously
- Students starting an end-on healthcare course on or after 1 August 2017, having completed a lower level qualification, disregarding the intervening vacation immediately before
- Students transferring to a healthcare course from a non-healthcare course on or after 1 August 2017

Alongside the standard package of support from SFE, the NHSBSA continue to make the Learning Support Fund available for additional expenditure that students incur on these courses. The additional support will not impact entitlement to SFE support and is available to all students attending these courses in England.

The additional support provided by the NHSBSA Learning Support Fund will be:

- Travel grant and dual accommodation – students will be able to apply for the reimbursement of travel costs and dual accommodation for practice placements from the NHS.
- Childcare additional funds – additional funding will be available to students with dependants.
- Exceptional Support Fund – the NHS will provide a limited hardship fund direct to students attending an applicable course.

Given the length of nursing, midwifery and AHP courses (exceeding 30 weeks and 3 days in an AY), students on these courses are often entitled to long courses loan. There was no change made to the long course loan policy in AY 17/18, therefore students on these courses are entitled to extra weeks of loan.

PT additional funds

In AY 17/18, the NHS continued to provide maintenance bursary support for a capped number of PT students attending an applicable course in England for the duration of the PT course. This support is administered separately from the Learning Support Fund and is available in addition to the SLC-administered PT tuition fee loans and DSAs.

This support package will not be available to students starting courses from AY 18/19 onwards following the introduction of PTML.

2.2.2 Students studying in Wales

The NHS Wales bursary package remains available for England-domiciled students studying nursing, midwifery and AHP courses in Wales. However, a new bursary eligibility requirement was introduced for courses starting on or after 1 August 2017. Students studying an eligible healthcare course in Wales must sign an agreement, committing to a period of time working within the NHS in Wales after course completion in order to be eligible for the bursary.

Note that in Wales the AHPs are chiropody, dietetics, healthcare science, DH/DT, occupational therapy, paramedic science, podiatry, physiotherapy, radiography and speech and language therapy.

Where an England-domiciled student agrees to the commitment to work in the NHS in Wales they will be eligible to apply for the healthcare bursary from NHS Wales. As per the arrangements for students eligible to apply for an NHS Bursary detailed in section 2.3, these students will only be able to access the RRML package from SFE (as per the guidance for pre-AY 17/18 courses below).

Alternatively, where an England domiciled student does not agree to the commitment to work in the NHS in Wales, they will not be eligible to apply for the healthcare bursary and will be able to access the standard package of support from SFE.

The commitment to work in the NHS in Wales criteria will be the responsibility of the NHS in Wales to administer.

Students will be informed by the HEP when they accept a place on the course to visit the NWSSP Student Awards Service website (on the Welsh Health Education Registration System section) where they will be asked to confirm electronically and in writing their commitment to work in Wales on completion of the course.

This will then enable them to apply for the NHS Wales Bursary Scheme. If the student does not want to access the NHS Welsh Bursary Scheme and prefers to access a student loan, in order to receive the full student loan they will need a unique reference number which is only generated by the Welsh Health Education Registration System. This will provide evidence to the student in order for SFE to establish they have not taken up the bursary in order for SFE to offer the full package of support.

In normal circumstances the student will not be able to change funding route, however in exceptional cases their application to change funding route will be considered through an appeals mechanism. If students do change and the NHS agrees, SFE will only re-assess these students for the relevant package from the next AY, unless there has been an error made in their initial assessment.

SFE are not responsible for students who breach the terms of their agreement with the NHS, either through withdrawal, transfer to a non-bursary course or inability to complete the requirement to work in Wales. The NHS in Wales will, in their terms and conditions, make clear that breaching the agreement will impact the student. The NHS are responsible for any follow up actions.

A sample check will be carried out retrospectively between the SFE and NHS Wales to ensure students are not being double funded. Students who have not taken up the bursary may still be entitled to travel support from NHS Wales, which does not impact their entitlement to SFE support.

2.2.3 Students studying in Scotland

From AY 17/18 England domiciled students studying on Nursing, Midwifery and AHP courses in Scotland will not be eligible for any of the previous healthcare bursaries. These students will be eligible for the standard package of support from SFE only.

Please note: as nursing and midwifery courses in Scotland previously attracted a non-income assessed healthcare bursary, these courses were ineligible for support and therefore were not included on the SLC's Course Management System (CMS). From AY 17/18 these courses will now be available on CMS for England domiciled students.

2.2.4 Students studying in Northern Ireland

From AY 17/18 access to nursing, midwifery and AHP courses was restricted for English domiciled students at HEPs in Northern Ireland. This decision was made to prevent England domiciled students (as well as Scottish and Welsh students) from accessing places on these courses and therefore support. However, these courses remained designated under the Student Support Regulations

Although there is no expectation for English domiciled students to be offered places on these courses this does not mean these students are explicitly ineligible to access funding. SLC have recently been made aware of instances where English domiciled students have gained access to these courses and may qualify for support in line with the Student Support Regulations.

2.3 Courses starting before 1 August 2017

2.3.1 Students studying in England

Income assessed NHS bursaries are available to most students on FT or PT courses leading to professional registration in:

- Chiropody
- Dental hygiene
- Dental therapy
- Dietetics
- Dietetics and Nutrition
- Nursing – Diplomas and Degrees (including courses to convert from second to first level registration)
- Midwifery – Diplomas and Degrees
- Occupational therapy
- Operating department practice – Diplomas and Degrees
- Orthoptics
- Physiotherapy
- Podiatry
- Prosthetics and orthotics
- Radiography
- Radiotherapy
- Speech and language therapy.

Please note that Optometry and Osteopaths are not courses that attract any NHS funding. These courses attract standard SFE funding, providing the student meets the eligibility criteria.

Please see <https://www.nhsbsa.nhs.uk/healthcare-students> for further details and up to date eligible subjects list.

Under regulation 38(4)(a), students are not eligible for grants for living and other costs for any AY during which they are eligible to apply for healthcare bursaries, NHS means tested bursaries or similar awards bestowed under section 63 of the Health Services and Public Health Act 1968, article 44 of the Health and Personal Social Services (Northern Ireland) Order 1972 or sections 73(f) and 74(1) and the Education (Scotland) Act 1980 (as amended)*.

Students who are eligible to apply for income assessed NHS bursaries or income assessed Healthcare awards from the DHSC are not eligible to apply to SFE for support for tuition, (regulation 19(2)) or any grants (regulation 38(4)(a)), however such students are eligible to apply to SFE for the non-income assessed RRML (regulation 68(e)(i)). The RRML amount for AY 22/23 can be found at [Section 1.1](#).

*in the case of the latter, only if granted in respect of a course leading to a qualification in a healthcare profession other than as a medical doctor or dentist.

From 2012 all new entrants to NHS funded courses receive the income assessed NHS bursary and will also receive a non-means tested grant of £1,000 from the NHSBSA. This means that students can apply for the RRML.

2.3.2 Students studying in Wales

The funding arrangements for students studying healthcare courses in Wales that started before 1 August 2017 are the same as those in England detailed in [section 2.2.1](#). However, the list of courses is as follows:

- Chiropody
- Dental hygiene
- Dental therapy
- Dietetics
- Healthcare science
- Midwifery
- Nursing
- Occupational therapy
- Paramedic science
- Podiatry
- Physiotherapy
- Radiography
- Speech and language therapy.

2.3.3 Students studying in Scotland

Students studying nursing and midwifery courses at Scottish HEPs that started before 1 August 2017 are eligible to apply for a non-income assessed bursary from SAAS. They are therefore ineligible for funding from SFE. This includes degree and diploma courses.

From AY 13/14, SAAS changed the funding regime for new and continuing AHP students studying in Scotland and, with the exception of nursing and midwifery students, have made available the “young students’ bursary (YSB)” and “independent students’ bursary (ISB)”. These are income assessed bursaries that are available to all students in Scotland. Students from England, Wales and NI studying AHP courses in Scotland can apply for these bursaries which have stricter means testing. Such students can apply to SFE for a RRML only as they remain in a bursary year. They will have their fees paid and can apply for a living costs bursary.

2.3.4 Students studying in Northern Ireland

Students studying nursing and midwifery courses at Northern Irish HEPs (Queens University and University of Ulster) that began before 1 August 2017 were eligible to apply for a non-income assessed bursary from DHSSPS NI, therefore they are ineligible for funding from SFE.

3. Medicine and dentistry students

3.1 Undergraduate students

First-time students on standard five or six year undergraduate medical and dental courses are eligible under the Regulations to apply for support on the same terms as other FT students for the first four years of their course (subject to previous study). For the fifth and subsequent years of their course they apply to the NHS for tuition support and an income assessed NHS Bursary and to SFE for the non-income assessed RRML.

There are some exceptions to this rule: students who intercalate on to another HE qualification during the first four years of their course will only be in the fourth year of their medical or dental course when they reach their fifth year of study but will still be eligible for the NHS bursary. Similarly, any students who undertook a foundation year as an integral part of their medical (or dental) course will be eligible for the NHS bursary in the fifth year of study. Students who repeat a year, however, will not be eligible for an NHS bursary until the fifth year of their course.

During the NHS Bursary year RRML is available for the remainder of their medical or dental course. Where a graduate is undertaking an undergraduate five or six year medical or dental course as a second degree, regulation 69(2) provides that as an exception course the student can receive the maintenance loan from SFE, and the supplementary grants (note that grants for dependants, travel grants and Disabled Students' Allowances (DSAs) are not subject to previous study or ELQ regulations).

Please note that medical and dental courses may be listed as level 7 postgraduate level on the QAA framework, however the QAA Framework does not form part of the Student Support Regulations. Under the Regulations, qualifications higher than a first degree, as set out in Schedule 2, are not funded. For the purposes of student support a course that leads to a qualification as a medical doctor or dentist is considered a first degree, and therefore maintenance loan and supplementary grants are funded exceptionally under ELQ rules.

Students who are studying these courses as a second undergraduate degree do not qualify for tuition fee loans or maintenance grants for 2012 or earlier cohorts, and 2016 cohort students do not qualify for tuition fee loans (regulation 13(1)). For additional information on support available to students with a first degree studying graduate-entry accelerated programmes in Medicine or Dentistry, please see section 3.3 Graduate Entry Medicine.

3.2 Intercalation on a medicine/dentistry course

In accordance with Regulation 13(1) of the Education (Student Support) Regulations 2011, a student will not normally be eligible for fee support where the course leads to a qualification that is equivalent to, or lower than, a qualification that has previously been awarded to that student (subject to limited exceptions, which are outlined in section 5.16 of this chapter).

Regulation 13(4) makes an exception to this rule. A course can be designated for fee support if it is a 'single course' and that course leads to an honours degree being conferred before the qualification for the first degree is awarded. Students registered on undergraduate courses leading to a qualification as a medical doctor, dentist, veterinary surgeon, architect, landscape architect, landscape designer, landscape manager, town planner or town and country planner who intercalate to obtain an honours degree are not precluded from receiving student support for the remainder of their first degree, even when the honours degree is conferred prior to the award of the first degree. Funding is available for both the intercalated course and first degree.

Students who intercalate to undertake a postgraduate qualification will not be eligible to receive support for their first degree following conferment of the postgraduate qualification. This is in accordance with Regulation 13(1). The conferment of a postgraduate qualification means that the student has a higher qualification than a first degree. However, where the intercalated postgraduate qualification is conferred by an institution at the same time or later than the first degree (despite the postgraduate course being completed at an earlier date), this will not preclude the student from being eligible for undergraduate funding for the entirety of their first degree.

Intercalating students will not be eligible for undergraduate student support for the postgraduate qualification but may be eligible for a Postgraduate Master's Degree Loan, subject to meeting the normal eligibility criteria.

Maintenance grant/Special Support Grant (pre-2016 cohorts only): maintenance loan and tuition fee loan are not available post intercalation of master's where a student holds the master's award, as the student now holds an ELQ. The exception to this is where the course leads to a qualification as a social worker, medical doctor, dentist, veterinary surgeon or architect in which case maintenance loan is available as these are exception courses (see section 5.16).

3.3 Graduate Entry Medicine

The Regulations provide that eligible students can apply for a tuition loan of up to £5,785 for the first academic year of their course and £5,535 in all other years of the course (regulation 23(8)). Graduate entry medical and dental students are however still required to self-fund the first £3,465 of the tuition charged in their first year. In years two to four of the course, the first £3,715 is paid as part of the income assessed NHS Bursary.

In year 1 students can apply for a means tested maintenance loan and supplementary grants from SFE and from year 2 to 4 of the course, as these students can apply for means tested NHS bursaries, they become eligible for the RRML (regulation 68(e)(i)), (regulations 80(1)(a) and 80(2)(a))

This support package applies to 2012 and 2016 cohort students.

4. Postgraduate healthcare students

4.1 Students starting courses on or after 1 August 2018

England domiciled students commencing study on designated pre-registration postgraduate healthcare courses after 1 August 2018 are no longer eligible to apply for NHS BSA Bursary support or HEE tuition fee support and will instead be entitled to the standard package of support available to UG students under the Regulations, including fee support, maintenance, long course loans and supplementary grants. For more information on the products available please see the “AY 22/23 Assessing Financial Entitlement guidance chapter”. The individual rates of support available are defined by the 2011 Regulations as amended. Eligible postgraduate healthcare students will be eligible to apply for UG DSA’s.

Postgraduate healthcare students will not be eligible for support under The Education (Postgraduate Master's Degree Loans) Regulations 2016. Any students transferring between a postgraduate healthcare course designated under the SSR and a postgraduate course designated under the Education (Postgraduate Master's Degree Loans) Regulations 2016 must reapply for funding under the correct legislative framework as a new student.

NHS Bursary funding and HEE tuition fee support is no longer available to the following categories of student, who will be eligible to apply to SFE for support under the Regulations:

- England domiciled students who start an eligible PG Healthcare course on 1 August 2018 or later.
- England domiciled students starting an eligible postgraduate healthcare course on 1 August 2018 or later, having withdrawn from or abandoned a previous undergraduate or postgraduate course in AY 17/18 or an earlier AY.
- England domiciled students starting an eligible postgraduate healthcare course on 1 August 2018 or later, having transferred from a course that was not an eligible postgraduate healthcare course, that started before 1 August 2018.
- England domiciled students who entered year one of an eligible postgraduate healthcare course that started on 1 August 2018 or later, having transferred from a postgraduate healthcare course that started before 1 August 2018.
- England domiciled students who entered year two or above of a postgraduate healthcare course that started on or after 1 August 2018 and are no longer eligible for NHS Bursary support*, having transferred from a postgraduate healthcare course that started before 1 August 2018.
- England domiciled students who start an eligible postgraduate healthcare course on 1 August 2018 or later and enter directly into a year greater than 1 (direct entrants).

*Students in these circumstances are required to provide evidence to SFE that they are no longer eligible for NHS Bursary support.

Alongside the standard package of support from SFE, the NHS BSA continue to make the following additional support available to students on these courses studying in England via the Learning Support Fund:

- NHS BSA Funding
 - Exceptional hardship grant
 - Child dependants' grant
 - Accommodation and travel grant

Receipt of these additional sources of support will not affect eligibility for PG Healthcare Support. For additional information on the support available via the NHS BSA Learning Support Fund, please refer to the NHS BSA website directly:

<https://www.nhsbsa.nhs.uk/learning-support-fund>

Given the standard length of postgraduate nursing, midwifery and AHP courses (often exceeding 30 weeks and 3 days in an AY), students on these courses are often entitled to long courses loan.

4.2 Professional registration status (postgraduate healthcare students)

While the rules in this section are broadly consistent with the rules detailed in section 6.3, the impact of professional registration status on student finance eligibility differs between PG Healthcare students (detailed below) and undergraduate students studying on pre-registration nursing, midwifery and AHP courses. For more information on the latter, please see Section 6.3 Professional Registration Status - Previous Study.

Postgraduate healthcare students' eligibility for support is not affected by previous study at a lower, equivalent or higher level, regardless of whether or not the student achieved the qualification (regulations 12(4B) and 13(2B)).

Students may already be professionally registered with either the Nursing and Midwifery Council (NMC) or the Health and Care Professions Council (HCPC). To be eligible for support under the Regulations, postgraduate healthcare students must not be registered in the pursued subject area of study (regulation 4(6C)). For example, where a professionally registered podiatrist is starting a postgraduate master's in podiatry, they would not be eligible for postgraduate healthcare support, as they are already professionally registered with the HCPC in that subject area.

Note that nursing students may further specialise in four distinct areas:

- Child nursing
- Adult nursing
- Mental health nursing
- Learning disabilities nursing

Those students who have not accessed postgraduate healthcare support previously can move freely between the four nursing subjects regardless of registration status. For example, a professionally registered adult nurse would not be eligible for postgraduate healthcare support for an adult nursing course, however they would remain eligible for postgraduate healthcare support for a child nursing course (providing they have not previously accessed postgraduate healthcare support and received a qualification).

See below table for further information.

Previous study (not funded by PG healthcare Funding)	New Course	Pre-reg Course	Student pre-registered	Eligible for PG healthcare Support	Policy rationale
BSc Adult Nursing	MSc Midwifery	Yes	Yes (registered as an adult nurse)	Yes	<p>Although the student is pre-registered, they are not registered within the relevant discipline of the new course.</p> <p>This student is eligible for all PG healthcare products, including UG DSAs.</p>
MSc Child Nursing	MSc Child Nursing	Yes	No	Yes	<p>Student not registered within relevant discipline of new course, previous study does not affect eligibility.</p> <p>This student is eligible for all PG healthcare products, including UG DSAs.</p>
BSc Mental Health Nursing	MSc Mental Health Nursing	Yes	Yes (registered as a mental health nurse)	No	<p>Although student has no equivalent or higher level qualifications, they are not eligible as they are already pre-registered within the relevant discipline.</p> <p>This student is ineligible for all PG healthcare products, including</p>

					UG DSAs. This student is also ineligible for PG DSAs.
BSc Adult Nursing	PgDip Specialist Community Nursing	No	Yes (registered as an adult nurse)	No	Course is a post-registration course and is not designated as a PG healthcare course for the purposes of student support. Where applicable, these students can access any available PG support including PG DSAs.

Students who are ineligible for postgraduate healthcare funding (including UG DSAs) due to prior professional registration will not be eligible to apply for PG DSAs (regulation 4(6C)). As a result, any student entering a designated pre-registration healthcare course that holds professional registration status within the pursued subject area of study, will be ineligible for any DSA support towards their studies.

PG healthcare students' eligibility for support may also be impacted by previous funding considerations. For further information, please see section 6.4 Previous Funding – PG healthcare students.

4.2.1 Eligible PG healthcare courses

Only students studying designated pre-registration* courses in AHP subjects, nursing or midwifery that will lead to a PG diploma or master's qualification are eligible for support under the Regulations.

*Under regulation 2(1) for a course to be a pre-registration course, it must lead to inclusion on the professional register of:

- (a) the Health and Care Professions Council, for AHP subjects other than dental profession subjects, or
- (b) the Nursing and Midwifery Council, for midwifery or nursing.

To be eligible for funding under the Regulations, PG Healthcare courses must be FT only – PT courses are not eligible to attract funding (regulation 139 (5A)).

Eligible PG healthcare courses must be at least two AYs in duration (regulation 5(1)(c)).

PG healthcare courses must not be distance learning – students must be studying the course in attendance only to be eligible for support under the Regulations (regulation 5(2A)).

Qualification level: Under regulation 2(1) funding is available for the following types of PG healthcare course:

- PG Master’s courses
- PG Diploma courses

These courses are all at Level 7 on the QAA Framework of HE qualifications.

Note that PG healthcare courses that start after 1 August 2018 are excluded under the Education (Postgraduate Master's Degree Loans) Regulations 2016, and therefore do not attract a PG Master’s Loan from SFE.

4.2.2 Repayments

Repayment conditions for PG healthcare students will be as per standard repayment policy under the Regulations and the Education (Student Loans) (Repayment) Regulations 2009 as amended. These students are subject to “Plan 2” repayment terms and conditions.

Where a student has received support from SFE for a previous course under the regulations, before subsequently receiving funding for PG healthcare, one loan repayment is made against the student’s plan 2 debit balance. The repayment amount is split proportionally according to the outstanding balance of each maintenance or tuition fee loan. This is contingent on the borrower having reached the statutory repayment due date (SRDD) for the latter course.

For detailed guidance on repayments please see the AY 22/23 Repayments Guidance chapter.

4.2.3 Additional cross-border considerations

England domiciled students who start a PG healthcare course on or after 1 August 2018, studying in Northern Ireland and Scotland are eligible for the full package of UG support available under the regulations. There is presently no NHS Bursary support available to students studying in Northern Ireland on these courses. While there remains bursary funded PG healthcare courses at Scottish HEPs, this support is administered by SAAS and is only available to Scotland domiciled students – England domiciled students are not eligible to apply for this type of support.

The Welsh Government has retained its bursary offer to PG healthcare students for courses starting on or after 1 August 2018. Students accessing this bursary are required to commit

to a period of working within Wales in suitable employment after completion of the funded course. Students who do not commit to this period of employment will not be considered eligible for an NHS bursary.

England domiciled students who start a PG healthcare course on or after 1 August 2018, studying in Wales and commit to a period of working within Wales in order to receive the bursary will be considered under the regulations to be eligible for an NHS Bursary and will therefore only be entitled to the RRML from SFE (regulation 68(e)(i)).

England domiciled students who start a PG healthcare course on or after 1 August 2018, studying in Wales and do not commit to a period of working within Wales following graduation will be entitled to the full UG support package available to PG Healthcare students from AY 18/19.

4.3 Students starting courses before 1 August 2018

4.3.1 Students studying in England

PG healthcare students who started their course in England before 1 August 2018 do not pay tuition fees for their courses – these costs are paid by DHSC via HEE. These students can apply for a bursary for living costs and other targeted allowances awarded by the NHS BSA.

Under regulation 3(3)(J) of The Education (Postgraduate Master's Degree Loans) Regulations 2016 students are not eligible for a PG Master's Loan in connection with a course which they are eligible to apply for a healthcare bursary, any allowance under the Nursing and Midwifery Student Allowances (Scotland) regulations 2007 or any allowance, bursary or award of similar description made under section 67(4)(a) of the Care Standards Act 2000. This includes payment for meeting additional expenditure incurred by the student by reason of the student's disability.

The following students remain eligible for NHS Bursary funding and HEE tuition fee support, and are therefore ineligible to apply to SFE for support under the regulations or The Education (Postgraduate Master's Degree Loans) Regulations 2016:

- Students who started a PG healthcare course before 1 August 2018, who are continuing on their course.
- Students who enter year two or above of an eligible PG healthcare course that started on 1 August 2018 or later and remain eligible for an NHS Bursary, having transferred from a PG healthcare course that started before 1 August 2018*.
- Students who started a PG healthcare course before 1 August 2018, suspended study and are now resuming study by continuing their course.

*Please note: Students who enter year one of an eligible PG healthcare course on 1 August 2018 or later, having transferred from a PG healthcare course that started before 1 August 2018 do not retain their NHS bursary eligibility and are eligible for support and are considered to start their course as a new student after 1 August 2018 for the purposes of student support under the Regulations.

4.3.2 Students studying in Wales, Northern Ireland and Scotland

From AY 17/18, England domiciled students studying in Wales will be required to commit to a period of working within Wales in suitable employment after completion of the funded course to be eligible for NHS Bursary support. England domiciled students studying PG healthcare courses that started before 1 August 2018 in Wales and have committed to the tie-in, are therefore eligible for an NHS bursary and are not eligible for any support from SLC (including the RRML).

England domiciled students studying PG healthcare courses that started before 1 August 2018 in Wales and have not committed to the tie-in may be eligible for a PG Master's loan under The Education (PG Master's Degree Loans) Regulations 2016 (as amended).

There are no NHS bursaries available to PG students studying healthcare courses in Northern Ireland. England domiciled students studying PG Healthcare courses that started before 1 August 2018 in Northern Ireland may be eligible for a PG Master's loan under The Education (Postgraduate Master's Degree Loans) Regulations 2016 (as amended).

NHS bursary support for courses studied at Scottish HEPs is only available to Scotland domiciled students on commissioned NHS courses. England domiciled students studying PG healthcare courses that started before 1 August 2018 in Scotland may be eligible for a PG Master's loan under The Education (Postgraduate Master's Degree Loans) Regulations 2016 (as amended).

5. Other courses and exceptions

5.1 Foundation years on NHS courses (Year 0)

Students studying an integral foundation year of an NHS course (both degree and diploma level) do not receive an NHS bursary and are therefore able to apply to SFE for full support. Prior to AY 17/18, once the student progressed into year one of their diploma or degree they became eligible for the means tested NHS bursary and as a result are entitled to a RRML only from SFE for the remainder of their course. Returning students, who progress from year zero to year one from AY 17/18 onwards, will continue to receive full support from SFE as they are no longer eligible to apply for an NHS bursary.

5.2 Paramedic courses (England)

Students on some paramedic courses may be eligible to receive funding through the Local Education and Training Boards (LETBS formerly Strategic Health Authorities) or Local Ambulance Service Trusts. Students who receive funding from these sources are deemed to be in receipt of a healthcare award and fall within the definition of a healthcare bursary (regulation 2 (1)) and whether they are eligible to apply for support from SFE depends on if the funding they receive from the DHSC is income assessed or non-income assessed.

- Where the student is awarded non income assessed funding for the paramedic course from their LETBS or health authority (see comment above re SHA) or Ambulance Service Trust the student is ineligible to apply for support under the SSR (regulation 4(3)(c)).
- Where the student is awarded income assessed funding for the paramedic course via their LETBS or Ambulance Service Trust the student the student is entitled to a RRML only from SFE (regulation 68(e)(i)).

In some circumstances the LETB or Ambulance Service Trust may still pay the student's tuition fee, in these cases the tuition fee should be set to zero on the LA portal and the student can apply for the full package of living cost support.

Where the student is not eligible to apply for any funding from the LETBS or Ambulance Service Trust they are eligible to apply for full support under the SSR.

Because of the varying types of support packages in place for paramedic courses, to determine what funding is being received by the student SFE will write to the student at application and request a letter from the HEI/ LETBS or Ambulance Service Trust confirming:

- Whether they receive any funding from the LETBS or Ambulance Service Trust.
- Whether the LETBS or Ambulance Service Trust pay the student's Tuition Fee.
- Whether the funding awarded is income assessed or non-income assessed.

Note that paramedic courses in Wales are considered to be an AHP course and as such attract the standard bursary and will be subject to the support arrangements described in section 2.2.2 above.

5.3 NHS secondees

The DHSC has confirmed that healthcare students who are employed by NHS trusts and seconded onto health care courses are not eligible for NHS bursaries.

These students continue to receive their salary and have their tuition paid by the NHS. The payment of their fees is outside of the NHS bursary scheme or Section 63 of the Health Services and Public Health Act 1968. As such these students are not excluded from the student support provisions and can therefore receive grants and loans for living costs on the same basis as other students, subject to them satisfying all the usual eligibility criteria. Note that NHS secondees are subject to the ELQ and previous study rules detailed in Section 6.

Seconded NHS employees will have their fees paid by the NHS. In order to prevent double funding of fee support, applications will be processed in the usual way by SFE. However, when approving the application SFE will prevent additional fee payments from being scheduled to the student's HEP.

5.4 Healthcare profession higher / degree apprenticeships

Higher / degree apprenticeships are a type of vocational training that allow students to combine periods of relevant paid employment with part-time study at a HEP. Depending on the level of course pursued, students studying on higher / degree apprenticeships will (on successful completion of their course), receive a Foundation Degree, Bachelor's Degree or Master's Degree respectively. Degree apprenticeships are currently only available in England and Wales and take between three and six years to complete.

There are presently a large number of healthcare based apprentice courses available which on successful completion lead to professional registration within a variety of healthcare disciplines, including:

- Midwifery
- Nursing
- Occupational Therapy
- Operating Department Practice
- Paramedicine
- Physiotherapy
- Podiatry
- Nursing Associate

Apprentices are employed and are therefore receiving a salary and their tuition fees will be paid by their employer and/or the Skills Funding Agency (SFA). Therefore, DfE have confirmed that although the course may meet the regulatory definition of a designated course under the Regulations, students receiving this type of funding are not eligible for any funding from SFE, including Disabled Students' Allowances.

5.5 Nursing associate courses

Nursing associate courses are Level 5 Foundation Degrees that allow the student on successful completion of their course to register professionally with the NMC as a nursing associate. As part of their programme of study, students on nursing associate courses undertake academic learning one day a week and work-based learning for the remainder of the week.

The funding available to students on these courses under the Regulations is dependent on the student's pathway of study. To qualify for funding in the first instance, the course must meet the regulatory definition of an eligible course contained within the Regulations. The most common pathways to study for students on nursing associate courses are via secondments or apprenticeships.

Apprenticeships: The DHSC have confirmed that they intend for the primary student base on these courses to be apprentices. Students studying nursing associate courses via apprenticeships are not eligible for support from SFE. For information on the financial support available to students on apprenticeships, please refer to section 5.4 Healthcare profession higher / degree apprenticeships.

NHS secondment: Students already employed within the NHS may choose to study their nursing associate course via a secondment. Students studying nursing associate courses via secondment are eligible to receive the standard package of support excluding fee support, as their tuition fees are paid by the NHS. For information on the financial support available to NHS secondees, please refer to section 5.3 NHS secondees.

Additionally, students may study nursing associate courses as a standalone foundation degree*, as opposed to pursuing either of the pathways referenced above. While it is not currently anticipated that there will be students of this type studying nursing associate courses, students in this scenario may be eligible for full support, providing they meet the standard eligibility criteria. For information on the available financial support for foundation degrees, please refer to the “SFE Assessing Eligibility Guidance AY 22/23.”

*Note that standalone foundation degrees are distinct from standalone foundation years. “Free-standing” foundation years that are not an integral part of a designated course are not designated for student support funding under the regulations. For further information on Foundation Years, please refer to the “SFE Assessing Eligibility Guidance AY 22/23.”

5.6 Social work courses

Social work courses do not attract an NHS or health care bursary, instead they attract the social work bursary.

Although administered by the NHSBSA, social work bursaries are not taken into account when assessing social work students for undergraduate support and they are eligible to apply for the full support from SFE that is available for their cohort.

Where students study a joint Honours course in nursing and social work and are eligible for an income assessed NHS bursary, they should receive RRML only from SFE (regulation 68(e)(i)). If the student is not eligible for the NHS bursary portion (post-August 2017) they will be eligible for the standard package of support.

6. ELQ and Previous Study

For detailed guidance on previous study please see the “Assessing Eligibility guidance”.

6.1 ELQ rules

Under the Regulations, the standard rule is that where a student already holds a previous HE qualification, they will not qualify for further fee loans for a second HE course, where the second HE course is an ELQ. Additionally, this restriction also applies to students on FT courses who wish to apply for further loans for living costs.

For example, a student with an honours degree cannot usually receive fee loan and loan for living costs support for another honours degree. Note that ELQ rules do not apply to FT dependants' grants and DSAs.

However in certain circumstances, the Regulations provide that the general ELQ rules are not applied to support for students undertaking second HE courses in certain subjects. This provision applies to certain healthcare related courses:

- From AY 17/18, where the student's new course is a pre-registration* course in an AHP subject**, midwifery, nursing, nursing and social work or operating department practice, the student is exempt from the ELQ restrictions noted above and can qualify for fee support (regulation 13 (2A)) and, for FT courses, loans for living costs (regulation 69 (2)(e)). Note that students must not already be professionally registered in the profession of the subject being studied to qualify for the disregard. Students who are already professionally registered and studying a further course in their registered profession are subject to the standard ELQ rules. For further information on prior professional registration on student funding eligibility, see section 6.3 Professional registration status – previous study.
- Where a student is studying on a healthcare course which attracts an income assessed NHS bursary or healthcare award from DHSC (regulation 68(e)(i)), they will remain eligible for a RRML for living costs, even when they hold a qualification that is equivalent or higher in level than their second course. This is applicable to all courses which attract NHS / healthcare bursaries starting before, on or after 1 August 2017.
- Where a student is studying on a course that leads to a qualification as a social worker, medical doctor or a dentist, the student is exempt from the ELQ restrictions noted above, but only in respect of loans for living costs (regulation 69 (2)(a)).
- In addition to the above, where a graduate is undertaking a FT UG 5 or 6 year medical or dental course as a second degree, the student does not qualify for fee loans (regulation 13(1)) in years 1 – 4 of their course but does qualify for a loan for living costs and supplementary grants (grants for dependants, travel grants and DSAs) from SFE (regulation 69(2)(a)). In years 5 and 6 of their course, the student is eligible to apply for an NHS bursary and qualifies for the non-income assessed RRML for living costs only from SFE (regulation 68(e)(i)).***
- Where a student is studying a postgraduate pre-registration healthcare course and has a previous equivalent or higher level qualification, this does not impact the student's eligibility for PG healthcare support(regulation 13(2B)), unless the student also accessed PG Healthcare funding from SFE to achieve the qualification (regulation 4(6D)) (please refer to section 6.4 Previous funding – PG healthcare students for further information). For more general information on funding available for postgraduate pre-registration healthcare courses, see Chapter 4 – Postgraduate healthcare students.

*A course is considered to be a pre-registration course if it leads to the award of a qualification that is required for the student to be included on the professional register of any of the following bodies (regulation 2(1)):

- The Health and Care Professions Council

- The Nursing and Midwifery Council
- The General Dental Council

**The Regulations define AHP subjects as follows (regulation 2(1)):

- Chiropody
- Dietetics
- Dietetics and nutrition
- Occupational therapy
- Orthoptics
- Orthotics and prosthetics
- Physiotherapy
- Podiatry
- Radiography
- Radiotherapy
- Speech and language therapy
- Dental hygiene and Dental therapy (for students starting courses on or after 1 August 2018 – for further information on DHDT courses, see section 2.1.1)

Note that only the above AHP subjects qualify for the ELQ disregard* – other types of healthcare professions including healthcare sciences, art, music or drama therapies and paramedic courses do not qualify for the ELQ disregard under the Regulations. However students with equivalent or higher level qualifications studying on paramedic courses that attract an NHS Bursary may still qualify for a RRML under the regulations - for additional information on funding available for Paramedic courses see section 5.2.

*This applies even where the course did not previously attract NHS Bursary support.

The ELQ exception for pre-registration healthcare courses applies in relation to a student's course, rather than their funding package, and therefore also extends to NHS secondees. Where a student is seconded by the NHS to a pre-registration course in an AHP subject, midwifery, nursing, nursing and social work or operating department practice, and that student holds an HE qualification equivalent to or higher in level than their new course, the student qualifies for the ELQ disregard and can qualify for loans for living costs. (NHS secondees do not qualify for fee support as their tuition fees are paid by the NHS – for further information on NHS secondees, see section 5.3).

*** Note that graduates who started undergraduate medical or dental courses as a second degree before 1 August 2016 do not qualify for Maintenance Grants or Special Support Grants for years 1 – 4 of their courses in AY 22/23.

6.2 Previous Study Disregard

Under the Regulations, the standard rule is that students can have tuition fee support for the standard length of their HE course, plus an additional year if needed. This is their standard entitlement (regulations 20, 21 and 22)). A student's standard entitlement to

tuition fee support will be reduced by the number of years that a student has studied on a previous HE course. For more information on the standard entitlement of students with previous years of HE study, see the *Assessing Eligibility Guidance Chapter*. However, new FT students starting a pre-registration course in an AHP subject, midwifery, nursing, nursing and social work or operating department practice in AY 17/18 and later* that do not attract NHS bursaries will have years of previous study on an HE course disregarded when their entitlement to fee loans is calculated (regulation 12(4A)) (for a definition of pre-registration courses and a list of AHP subjects, please see the previous section). FT students therefore qualify for fee loan support for the full duration of these courses, regardless of whether or not they have studied on previous HE courses.

*With the exception of DHDT courses, to be eligible for the previous study disregard students must commence these courses in AY 18/19 or later. For further information on DHDT courses, please refer to section 2.1.1.

Please note that in order to have previous years of HE study disregarded when calculating the student's tuition fee entitlement, students must not be professionally registered in the profession of the subject being studied. Students who are already professionally registered and studying a further course in their registered profession are subject to the standard previous study arrangements. For further information on the impact of prior professional registration on student funding eligibility, see section 6.3 Professional registration status – previous study.

Loans for living costs are not subject to previous years of study calculations, however the ELQ rules detailed in the previous section apply.

Under the Regulations there are specific provisions for students studying medicine or dentistry as a second undergraduate degree or on a graduate entry programme. These are detailed in the medicine and dentistry section above.

6.2.1 Previous Study Disregard – PG healthcare students

PG healthcare students' eligibility for support is not affected by previous study at a lower, equivalent or higher level, regardless of whether or not the student achieved the qualification (regulation 12(4B) and regulation 13(2B)). However, previous PG healthcare funding may affect the students' eligibility for future support. For further information on how previous funding affects PG Healthcare student eligibility, please refer to section 6.4 Previous funding – PG healthcare students.

PG healthcare students' standard entitlement for tuition fee support is calculated as $(OD + 1) - PC$, where OD is the number of years that make up the ordinary duration of the course and PC is the number of AYs that the student has spent on previous courses. As per the Regulations (regulation 12(4B)), a course which would otherwise be a previous course (PC) is not treated as such if the current course is a postgraduate pre-registration course in an AHP subject, midwifery, or nursing. As a result, PG healthcare courses represent previous study exception courses under the regulations.

6.3 Professional registration status – previous study

In order to qualify for the ELQ and previous years of study disregard noted in sections 6.1 and 6.2, students studying on a pre-registration course in an AHP subject, midwifery, nursing, nursing and social work or operating department practice must not be professionally registered in the profession of the subject being studied. Students may be professionally registered with either the Nursing and Midwifery Council (NMC) or the Health and Care Professions Council (HCPC).

For example, where a professionally registered physiotherapist is starting a new honours degree in physiotherapy, they would not qualify for the disregards detailed above, and would be subject to the standard ELQ and previous study rules applicable to HE students with a previous qualification / years of study.

Note that nursing students may further specialise in four distinct areas:

- Child nursing
- Adult nursing
- Mental health nursing
- Learning disabilities nursing

Students studying on nursing courses leading to a qualification in any of these specialties can qualify for the ELQ / previous study disregard providing they are not already professionally registered within the specific area of speciality. For example, a professionally registered mental health nurse can study a course leading to a qualification in any of the three other nursing specialties as they are not considered to hold professional registration in any of these areas. However, the student could not qualify for the ELQ / previous study disregard if they wished to study a further course in mental health nursing.

Where an applicant for support towards a nursing course is already a professionally registered nurse, SLC may carry out further enquiries to clarify that the student is not already registered in the specific discipline of the new course.

Professional registration in any AHP subject, midwifery, nursing, nursing and social work or operating department practice area normally requires the student to hold a previous HE qualification, therefore it is likely that in practice these students will already have previous years of study and an equivalent or higher qualification when undertaking any future HE course.

For further information, see Annex C.

6.4 Previous funding – PG healthcare students

PG healthcare student's eligibility for support is not affected by previous study at a lower, equivalent or higher level, regardless of whether or not the student achieved the qualification. However, previous PG healthcare funding may affect the student's eligibility for future support.

Students who have received PG healthcare funding from SFE for a previous PG healthcare course, and received a qualification during that period of eligibility, are not eligible for future PG healthcare funding from SFE (regulation 4(6B)). This is the case even where the student did not previously receive the full payment of support. Where applicable, students who are ineligible for future PG healthcare funding due to having previously accessed this package of support and received a qualification, will be eligible to apply for PG DSAs (regulation 4(6E)).

Where a student has previously received PG healthcare support to the end of a period of eligibility (for example, where the student has withdrawn from or abandoned their course) but did not receive a qualification, they will remain eligible for PG healthcare funding for future periods of eligibility.

Annex C

The below table details a number of examples of where prior professional registration will prevent students on AHP, midwifery, nursing, nursing and social work or operating department practice courses from having any previous study / previous qualifications disregarded.

New Course	Previous Study	Qualification Gained	Professionally Registered	Outcome
BSc Adult Nursing	BSc Geography	Yes	No	Student's previous study can be disregarded, as the student is not professionally registered as an adult nurse
BSc Midwifery	BSc Nursing	Yes	Yes – Student is professionally registered as a nurse	Previous study can be disregarded, as although the student holds professional registration, they are not professionally registered as a midwife
BSc Radiotherapy	MSc Chiropody	Yes	Yes – student is professionally registered as a chiropodist	Previous study can be disregarded, as although the student holds professional registration, they are not professionally registered as a radiotherapist
BSc Radiotherapy	BSc Radiotherapy	Yes	Yes	Previous study cannot be disregarded, as the student is already

				professionally registered as a radiotherapist
BSc Child Nursing	BSc Child Nursing	Yes	Yes – Student is professionally registered as a child nurse	Previous study cannot be disregarded, as the student is already professionally registered as a child nurse
BSc Mental Health Nursing	BSc Mental Health Nursing	No	No	Previous study can be disregarded – although the student has previous study on a child nursing course, they are not professionally registered as a child nurse
